EDUCATION

Queen Mary University of London

MSc Computer Science | Grade: Merit

September 2024

Smt. Indira Gandhi College of Engineering

BS Computer Science | GPA: 9.0

May 2023

Relevant Coursework: Algorithms, Data Structures, Data Science, Operating Systems, Machine Learning

TECHNICAL SKILLS

Languages: Java, Python, C/C++, C#, JavaScript, SQL, Arduino, DART

Technologies: React, React Native, Node.js, MongoDB, Flask, TensorFlow, OpenCV, Keras, SciKit-learn

EXPERIENCE

Mercor | Software Engineer Contractor

Feb 2025 – Current

- Developed and implemented guidelines to evaluate the functionality, accuracy, and efficiency of AI-generated code.
- Helped improve AI model performance by identifying edge cases and giving organized feedback.
- Worked with different teams to refine evaluation metrics and support ongoing model development.

CoSwipe | Software Engineer Contractor

Dec 2024 – Dec 2025

- Helping launch CoSwipe, a mobile app enabling group purchase splitting at the point of sale via virtual cards.
- Assist in the design & creation of the CoSwipe website using JavaScript & React that serves 1,000+ monthly users.
- Developed the API endpoints to allow users to select multiple transactions and split all purchases at once.

Krystal | Administrative Head

Sept 2021 – Oct 2023

- Managed end-to-end administrative operations for a 25-employee startup, ensuring smooth daily business functions and efficient office management.
- Maintained employee records, coordinated staff schedules, supported onboarding, and handled confidential documentation with accuracy.
- Assisted recruitment processes, internal communications, and cross-department coordination while fostering a positive workplace culture.

FTS Group | Operations and Marketing Intern

Oct 2021 – Nov 2021

- Explored marketing strategies and client relations, strengthening expertise in web solution development by leading a team of seven in building a website for a startup.
- Conducted market research for a agro based startup, Ensured seamless communication between the client and the team, managed end-to-end recruitment process for the project.

PROJECTS

Elderly Care App | DART, SQLite, Java, Heroku, TomTom API, OpenCage

- Developed a mobile app using DART & Flutter to help 20 elderly people in care homes and ensure their safety.
- Implemented fall detection & added location tracking achieved using OpenCage & TomTom API.

WINGMAN - Gesture Controlled Drone | Python, Keras, Flask, Arduino

- Built a fully functional drone controlled via hand gestures using a custom ML model and Arduino ESP-12S.
- Developed a HGR model using Python and Keras, trained using a dataset from Kaggle to recognize gestures.

Face Mask Detector | Python, TensorFlow, OpenCV, Machine learning

- Developed a real time face mask detector using OpenCV and neural networks method. Implemented various forecasting techniques and TensorFlow to predict masks image and retained a 97% accuracy level.
- Developed CNN model with MobileNet V2 architecture as base model integrating with 2 FC layers and trained it using the open dataset.

Moodsic | Python, Keras, Flask, OpenCV, Tensorflow

- Created an app to detect users' mood based on facial expressions to recommend music. Developed a CNN model trained on 19,000 faces to categorize user mood into 12 types and achieved an accuracy of 95%.
- Integrated with Spotify's API to develop custom music recommendations and play music from the app.

Banking System | *React, Node.js, MySQL*

- This system was developed to manage various banking operations which comprised of a frontend using React.js, a backend using Node.js and utilized a MySQL database to manage data efficiently.
- The project included features like User Authentication, Account overview, loan applications, transaction and profile management.
